

Custom Home Control

with I N S T E O N

Why Should I Use INSTEON-Compatible Products?

Customized Lighting

With INSTEON-compatible lighting products, you control the personality of your home. With one button set your ideal lighting scene in the living room, accentuate your favorite art piece, or plan party lighting that will impress your guests. The beauty of INSTEON-compatible lighting control is that you decide.

Compatibility

All INSTEON-compatible products are interoperable, so you can connect anything to anything! Look for award-winning INSTEON technology in other products:

- Climate Control • IP Control • Security • Audio Visual
- Irrigation • HVAC • Access Control • Appliance Management
- Pool & Spa

Peace of Mind

An INSTEON network provides the peace of mind you need to protect your family and your home. You can easily make sure that your lights and appliances are off when you leave for work or on when you come home late.

Simple Installation

INSTEON-compatible products are easy to install and set up, making it easy to customize and configure each home network.

For more information on INSTEON-compatible products go to www.insteon.net www.smarthome.com

SmartLabs Design brings you lighting control products that let you customize the lighting in your home. You can create personalized scenes by creating links between any two INSTEON-compatible products. For example, use a handheld RemoteLinc to control your home theater lights from the comfort of your chair.

It's easy to install and set up using your home's existing wiring - the rest is up to you!

LampLinc™ / ApplianceLinc™ 2456D2, 2456D3, 2456S3

- Control any lamp remotely with simple plug-in setup
- Create new switched outlets from the light switch you choose
- Add a lamp to lighting scenes in minutes
- Adjustable on levels and ramp rates
- Available in a 300W LampLinc or a 15A ApplianceLinc

SwitchLinc™ 2476D, 2476DH, 2476S, 2476ST
